# Perusall - Social reading platform

Perusall will be available in **HKU Moodle** next week.

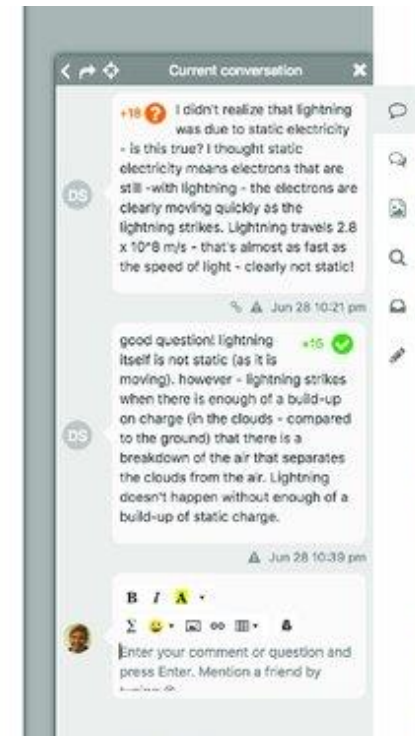

The sidebar of the Perusall interface includes the following sections:

- Perusall physic...** (with a close button)
- Course home**
- My scores**
- Add to my calendar**
- Readings**
- Documents**
  - College E&M Textbook
- Assignments**
  - Feb 12: Assignment 1: ...
- Chats**
- Groups**
  - 3 Announcements
  - General discussion
- One-on-One**

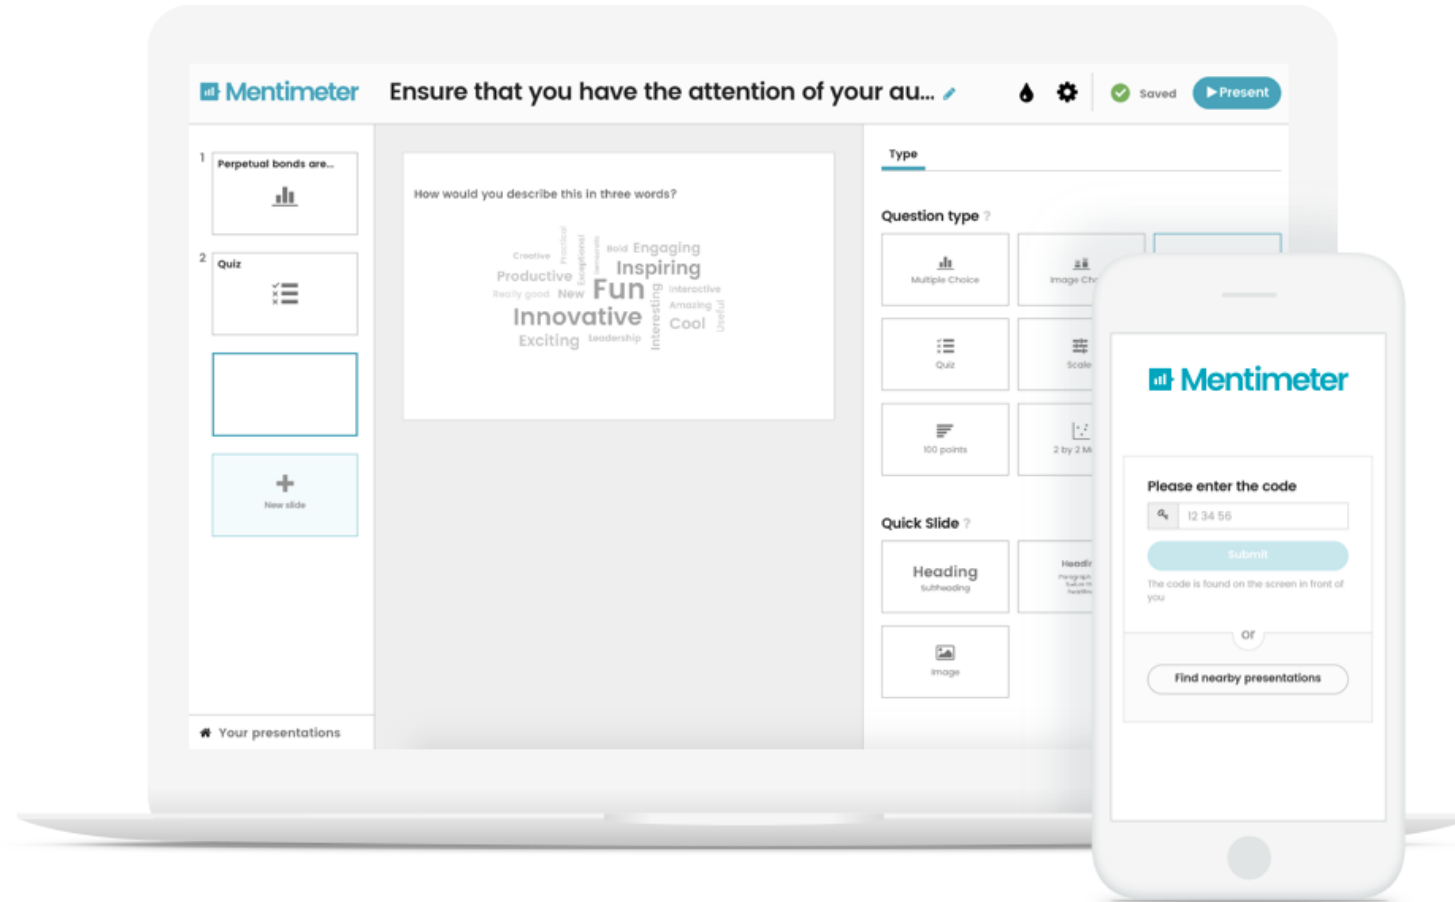

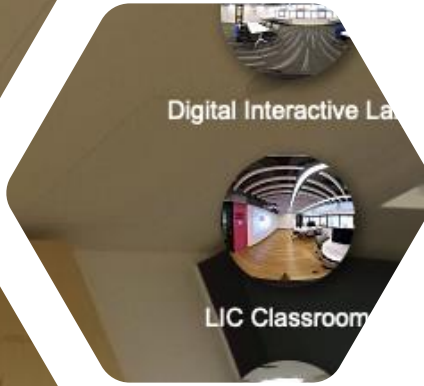

The reading page displays a document titled "Introduction to Electric Charge and Electric Field". It includes a list of bullet points at the top, a section header "18.8 Applications of Electrostatics", and a paragraph of text. A diagram shows a lightning bolt striking a tree, with a person standing nearby. Below the diagram is a caption and a paragraph of text. The page is annotated with a red 'X' and a yellow lightning bolt icon.

The chat conversation is titled "Current conversation". It shows a discussion about lightning and static electricity. The first message, from a user with a +18 reputation, asks if lightning is due to static electricity and if it's true that static electricity means electrons that are still. The second message, from a user with a +16 reputation, explains that lightning is not static because electrons are moving quickly, and that lightning travels at  $2.8 \times 10^8$  m/s, which is almost as fast as the speed of light. The third message, from a user with a +16 reputation, responds that lightning is not static because it is moving, but that lightning strikes when there is enough of a build-up of charge in the clouds compared to the ground, and that there is a breakdown of the air that separates the clouds from the air. The chat interface includes a text input field at the bottom and a list of icons on the right side.

Editing Room

Machine Room

One Button Studio

## DIY Studio

<https://teli.hku.hk/tips/>

A large background image of a production studio. The studio features a green screen on the left, a red chair, a yellow stool, and a camera on a tripod. The wall has a large crest with the Chinese characters '明德' and '格物' and the Latin motto 'SAPIENTIA ET VIRGAS'. The text 'TEACHING INNOVATION PRODUCTION STUDIO' is overlaid in the center, with colorful brackets in red, blue, yellow, and green. The TeLi logo is also visible on the wall.

# Student helpers

- **Goal:** To support innovative and **online pedagogies** in the Faculty and to trial new learning platforms with the e-learning team.
- **Duties:**
  - To help provide **in-classroom** and **online e-learning** support for teachers.
  - To help **manage and operate video communications software** for teachers.
  - To help provide **video communications activities support** for teachers during lessons.

I am planning to use the following online educational resources in the coming semester:
